Semester V

Core: Open Source Software-512E

Multiple Choice Questions.

1. Which is a proprietary operating system?

- A. Unix
- B. OS X
- C. Windows
- D. Linux

ANSWER: C

2. What is distributed development?

- A. Maintaining database in several locations during development.
- B. Sharing database from several locations during development.
- C. Dumping the source code at several locations.
- D. Globally distributed teams to develop the software.

ANSWER: D

3. Which of the following is a open source software/database?

- A. Visual Basic.
- B. Oracle.
- C. MySQL.
- D. Lotus.

ANSWER: C

4. Which of the following is not true for open source software?

- A. It is owned by a person.
- B. It supports distributed development.
- C. It supports collaborative developement.
- D. Its code is available for all.

ANSWER: A

5. Which of the following is a front end?

- A. Safari.
- B. Eudora.
- C. Konquerer.
- D. Mergeant.

ANSWER: D

6. The identical operator in PHP is_____.

- A. =

- B. ==.
- C. ====.
- D. <>.

ANSWER: C

7. BitKeeper is a _____.

- A. Search engine.
- B. backup.
- C. website.
- D. version control.

ANSWER: D

8. BitKeeper is a good choice for _____.

- A. Microsoft Windows.
- B. Novell Netware.
- C. Linux.
- D. OS X.

ANSWER: C

9. Which version control can be used for managing multiple repositories and multiple incoming patch streams?

- A. CVS.
- B. BitKeeper.
- C. RCS.
- D. Subversion.

ANSWER: B

10. What is the acronym of IRC?

- A. Internet Remote Chat.
- B. Internet Relay Chat.
- C. Intra Resource Communication.
- D. Inter Resource Communication.

ANSWER: B

11. What is the acronym for VoIP?

- A. Voice over Internet Protocol.
- B. Vocal Internet Protocol.
- C. Visual on Inter Protocol.
- D. Visual Internet Protocol.

ANSWER: A

12. Features like integrated version control, bug control, and mailing lists to write vast amount of software is given by _____.

- A. Google.
- B. Yahoo.
- C. SourceForge.
- D. Wiki.

ANSWER: C

13. What is Bugzilla?

- A. A bug-tracking mechanism.

- B. A version control.
- C. A bug-correcting software.
- D. It involves both version control and bug-tracking mechanism.

ANSWER: A

14. Expansion of EULA is _____.

- A. End User Lock Argument.
- B. End User License Agreement.
- C. End User License Argument.
- D. End User Lock Agreement.

ANSWER: B

15. Which of the following is proprietary?

- A. OpenOffice.
- B. Oracle
- C. MySQL.
- D. Postgres.

ANSWER: B

16. Which one of the following is open source?

- A. Windows
- B. Office
- C. MySQL
- D. SQL Server

ANSWER: C

17. Bugs persist longer in _____.

- A. open codebases.
- B. proprietary codebases.
- C. free codebases.
- D. closed codebases.

ANSWER: D

18. A software that has both proprietary license and open source license is called _____.

- A. multiple licensed software.
- B. uncontrolled software.
- C. dual licensed software.
- D. mixed licensed software.

ANSWER: C

19. Software with academic license _____.

- A. does not provide the source code to the user.
- B. requires just an acknowledgement.
- C. can be used by the companies.
- D. can be used by anyone.

ANSWER: B

20. Dual licensing business rely on open source as _____.

- A. production strategy.
- B. development strategy.
- C. distribution strategy.

D. production and distribution strategy.

ANSWER: C

21. Acronym of GPL is _____.

- A. General Public License.
- B. General Private License.
- C. Global Publish License.
- D. Global Program License.

ANSWER: A

22. Open source softwares are distributed mainly through _____.

- A. CDs.
- B. Internet.
- C. memory cards.
- D. HDDs.

ANSWER: B

23. Dual licensing works for _____.

- A. work having many contributors.
- B. collaboratively developed softwares.
- C. single, well defined owner of a work.
- D. open source software following development strategy.

ANSWER: B

24. _____ is a reciprocal license.

- A. GPL
- B. BSD License
- C. Ms-RSL
- D. Ms-LPL

ANSWER: A

25. Why software licensing revenue is considered as a good revenue?

- A. Licensed software can be sold for more value.
- B. Licensing a software is very easy.
- C. Licensing a second copy of the software is possible without any additional cost.
- D. Licensed software are accepted good than others in the market.

ANSWER: C

26. Which permits all sorts of business to make money with confidence?

- A. Marketing.
- B. Legal infrastructure
- C. Quality of product.
- D. Good will of the company.

ANSWER: B

27. Ownership applies to _____.

- A. tangible properties only.
- B. intangible properties only.
- C. both tangible and intangible properties.
- D. software only.

ANSWER: C

28. Which balances the interest of the creator of a work, with the interest of consumers who purchase those copies?

- A. License.
- B. Trademark.
- C. Copyright law.
- D. Warranty.

ANSWER: C

29. Which clarifies the issues and resolves disputes among author and reader?

- A. License.
- B. Trademark.
- C. Copyright law.
- D. Warranty.

ANSWER: C

30. The employment agreement of a company with programmer usually says, the code written by the programmer is the property of _____.

- A. himself.
- B. employer.
- C. buyer.
- D. his team.

ANSWER: B

31. Which license enforce sharing?

- A. Reciprocal license.
- B. Academic license.
- C. Berkley Software Distribution.
- D. Proprietary license.

ANSWER: A

32. Which of the following is an academic license?

- A. PUL.
- B. GPL.
- C. SPL.
- D. BSD.

ANSWER: D

33. Proprietary licenses _____ for that consideration.

- A. have some rights and pay a fee
- B. have no rights and pay little fee
- C. have some rights and pay no fee
- D. have no rights and pay no fee

ANSWER: A

34. Making a software available on open source terms, creates it with a _____.

- A. small and expensive distribution channel.
- B. large and inexpensive distribution channel.
- C. large and expensive distribution channel.
- D. small and inexpensive distribution channel.

ANSWER: B

35. Which of the following provides clear warranties?

- A. Proprietary software.
- B. Open source software.
- C. Free software.
- D. As is' software.

ANSWER: A

36. Which protects dual-licensing vendors from unscrupulous competition?

- A. Copyright law.
- B. Pre-emption.
- C. Warranty.
- D. Reciprocity.

ANSWER: B

37. Which of the following is a most crucial key attribute for the venture capitalist to fund open source business?

- A. Defensible business model.
- B. Solid market presence.
- C. Good team.
- D. Good management.

ANSWER: A

38. Which license works well for a dual-licensing business?

- A. Academic license.
- B. Reciprocal license.
- C. Per-user license.
- D. BSD.

ANSWER: B

39. Acronym for FSF is _____.

- A. Files Software Foundation.
- B. Free Software Federation.
- C. Free Software Foundation.
- D. First Software Foundation.

ANSWER: C

40. How a dual-licensing business measured?

- A. Money spent by the public for the product.
- B. Money spent by the public for the service.
- C. Money spent by the public for the license.
- D. Size of installed base in the market.

ANSWER: D

41. Dual-licensing business earns through _____.

- A. support.
- B. service.
- C. license.
- D. service and license.

ANSWER: D

42. Piracy is possible in _____.

- A. open source software.
- B. proprietary software.
- C. all types of softwares.
- D. dual-licensed software.

ANSWER: C

43. Which of the following is given more importance by a programmer?

- A. Coding.
- B. Testing.
- C. Debugging.
- D. Interface cleanup.

ANSWER: A

44. Which is not an advantage of dual-licensed product?

- A. Low cost distribution.
- B. Low piracy.
- C. High margin, scalable revenue.
- D. Powerful product marketing.

ANSWER: B

45. In which year, the Chinese Government announced its intention to invest in the development of a version of Linux?

- A. 2000.
- B. 2002.
- C. 2004.
- D. 2006.

ANSWER: C

46. Software vendors are generally interested in _____.

- A. Business market.
- B. Industrial market.
- C. Education market.
- D. Share market.

ANSWER: C

47. Which license best suits to protect the competitive position of the newest products and services?

- A. Proprietary License.
- B. Open source license.
- C. Per-user license.
- D. Dual-license.

ANSWER: A

48. In which sector of the market open source is successful?

- A. Newer market.
- B. Immature market.
- C. Stable market.
- D. Mature and stable market.

ANSWER: D

49. Open source softwares are softwares that are _____.

- A. available for free of cost.
- B. available for some cost.
- C. not having any license.
- D. owned by some persons.

ANSWER: A

50. Which of the following is a open source software?

- A. Visual Basic.
- B. Oracle.
- C. MySQL.
- D. Lotus.

ANSWER: C

51. PHP stands for _____.

- A. Hypertext Preprocessor.
- B. Perfect Hypertext Preprocessor.
- C. Past Hypertext Preprocessor.
- D. Process HyPertext.

ANSWER: A

52. PHP is a _____.

- A. client-side scripting language.
- B. server-side scripting language.
- C. both server-side and client-side scripting language.
- D. structured programming language.

ANSWER: B

53. Which one is right in PHP?

- A. `var_name = $value;`
- B. `$var_name = $value;`
- C. `$var_name = value;`
- D. `var_name = value;`

ANSWER: C

54. Choose correct syntax to print "R4R Welcomes You!" using PHP in HTML.

- A. `<html><body><?php echo "R4R Welcomes You!";?></body></html>`.
- B. `<html><body><?php write "R4R Welcomes You!";?></body></html>`.
- C. `<html><body><?php display "R4R Welcomes You!";?></body></html>`.
- D. `<html><body><?php print "R4R Welcomes You!";?></body></html>`.

ANSWER: A

55. In php string data are _____.

- A. ".".
- B. "".
- C. delimited by <<< identifier.
- D. All of above.

ANSWER: D

56. Which of following variable scope that is not supported by PHP?

- A. Local variables.
- B. Function parameters.

C. Hidden variables.

D. Global variables.

ANSWER: C

57. Which of following is invalid identifier in PHP?

A. my_function.

B. size.

C. some1 word.

D. This&that.

ANSWER: D

58. The left association operator % is used in PHP for _____.

A. percentage.

B. bitwise or.

C. division.

D. modulus.

ANSWER: D

59. Which variable does not lose its value when the function exists and use that value if the function is called again. Which scope is it?

A. Local.

B. Function parameter.

C. Static.

D. None of above.

ANSWER: C

60. Which datatypes are treated as arrays _____.

A. Integer.

B. Float

C. String.

D. Booleans.

ANSWER: C

61. Who is the creator and original driving force behind PHP?

A. Rasmus Lerdorf.

B. Gilmore.

C. Andi.

D. Zend.

ANSWER: A

62. Which version of PHP added the Object-oriented Programming functionality?

A. PHP3.

B. PHP4.

C. PHP5.

D. PHP6.

ANSWER: C

63. Which of the following is a server-side technology?

A. Cascading style sheets.

B. Flash animations.

C. Java applets.

D. JSP.

ANSWER: D

64. Which is a valid escaping to PHP from HTML?

A. <# #>.

B. <% %>.

C. <PHP >.

D. <? >.

ANSWER: B

65. PHP is embedded within _____.

A. ASP.

B. JSP.

C. HTML.

D. C.

ANSWER: C

66. When PHP is case sensitive?

A. In keywords only.

B. In variable names only.

C. In both keywords and variable names.

D. Not in both keywords and variable names.

ANSWER: B

67. Java script and VBscript are mainly used for _____.

A. event handling.

B. formatting pages.

C. small stand-alone applications.

D. animation.

ANSWER: A

68. Which of the following is used to add PHP to HTML when it is stored in a separate file?

A. Includes.

B. imports.

C. require.

D. import.

ANSWER: C

69. In PHP redeclaring functions results in _____.

A. an exception.

B. an automatic fatal error.

C. successful interpretation.

D. Warning.

ANSWER: B

70. Which of the following is least strict when used to import PHP function?

A. Require.

B. include_once.

C. include.

D. require_once.

ANSWER: B

71. _____ is a valid PHP variable.

- A. \$pi.
- B. 1pi.
- C. Pi-.
- D. \$1pi.

ANSWER: A

72. What happens if variables are used before they are assigned?

- A. Raises exception.
- B. Takes default value.
- C. Takes garbage value.
- D. Raises error.

ANSWER: B

73. What is the type of a variable in PHP?

- A. Type that was used for declare.
- B. Type of current value stored in it.
- C. Type of value that was assigned initially.
- D. Integer.

ANSWER: B

74. Pick out the PHP function to check if a variable is assigned with a value or not.

- A. Isset().
- B. Set().
- C. IsSet().
- D. set().

ANSWER: C

75. Which method is used to define your own constant in PHP?

- A. const method.
- B. fixed method.
- C. namedConst method.
- D. define method.

ANSWER: D

76. What is the result type of the expression $3 + 0.14159$ in PHP?

- A. Integer.
- B. Short.
- C. Double.
- D. Byte

ANSWER: C

77. What is the result of the executing the following code snippet, `a=substr(12345,2,2); print(a);`

- A. 34.
- B. Error.
- C. 23.
- D. Exception

ANSWER: A

78. Which type hold the references to resources external to PHP?

- A. References.
- B. Resources.
- C. Object.
- D. Strings

ANSWER: B

79. Hexadecimals are specified with _____.

- A. Trailing 0x.
- B. Leading 0x.
- C. Trailing x.
- D. Leading x.

ANSWER: B

80. A string value is interpreted as Boolean false if _____.

- A. If it is "0".
- B. If it is "NULL".
- C. If it is empty.
- D. If it is "false".

ANSWER: C

81. Strings in PHP are _____.

- A. Written within single quotes.
- B. Written within double quotes.
- C. Written within ' or ".
- D. Written within &.

ANSWER: C

82. `a=10; b=5; print("a + b = b + a");` What is the output of the above code?

- A. True.
- B. 15.
- C. 5 = 15.
- D. `10 + 5 = 5 + 10.`

ANSWER: D

83. What is limit on string length in PHP?

- A. 255.
- B. 65568.
- C. 1024.
- D. No artificial limit.

ANSWER: D

84. Which of these can accept more than one argument?

- A. Echo.
- B. print.
- C. both echo and print.
- D. neither echo and print.

ANSWER: A

85. Which of the following has the highest precedence in PHP?

- A. `&&`.
- B. `!.`

C. And.

D. or.

ANSWER: B

86. Which of the following has the lowest precedence in PHP?

A. Or.

B. !.

C. ||.

D. And.

ANSWER: A

87. Which one of these is an identical operator?

A. =.

B. ==.

C. ===.

D. ~.

ANSWER: C

88. The expression of PHP switch can evaluate to ____.

A. Integer, double or string.

B. Integer only.

C. Double only.

D. String only.

ANSWER: A

89. The break statement performs _____.

A. Exits outermost loop.

B. Exits innermost loop.

C. Skips to the end of innermost loop.

D. Skips to the end of outermost loop.

ANSWER: B

90. Which of the following is used to terminate the execution of loop in PHP?

A. end().

B. terminate().

C. disclose().

D. die().

ANSWER: D

91. To suppress errors for any single expression, use _____.

A. '.

B. @.

C. ^.

D. #.

ANSWER: B

92. To make a variable name mean the same thing as it does in the context outside the function, use

_____.

A. Global.

B. Local.

C. Static.

D. Const.

ANSWER: A

93. PHP functions can be defined _____.

- A. only in the starting of the code that uses it.
- B. only at the end of the code that uses
- C. anywhere in the script that uses it.
- D. out the code that uses it.

ANSWER: C

94. Functions that call each other is called _____.

- A. recursive function.
- B. mutually recursive function.
- C. exclusive function
- D. normal function.

ANSWER: B

95. In PHP, when error-report is set to E-ALL, then too many arguments passed by the caller to a callee _____.

- A. is ignored.
- B. raises an exception.
- C. reports an error.
- D. reports a warning.

ANSWER: A

96. MySQL was born in _____.

- A. Mexico.
- B. Russia.
- C. Sweden.
- D. Australia.

ANSWER: C

97. MySQL's first public release was in the year _____.

- A. 1992.
- B. 1993.
- C. 1995.
- D. 1996.

ANSWER: D

98. MySQL is said to be flexible because _____.

- A. it supports query caching.
- B. its binaries are available for many platforms.
- C. it support replication.
- D. it supports full-text indexing and searching.

ANSWER: B

99. How many character sets does MySQL have?

- A. 20.
- B. 30.
- C. 40.
- D. 45.

ANSWER: B

100. Which of the following feature did MySQL had when it was released initially?

- A. Views.
- B. Stored Procedure.
- C. Subqueries.
- D. Speed and Performance.

ANSWER: D

101. Which of the following feature helps in enhancing the performance of mining data in MySQL?

- A. Full text indexing and searching.
- B. Query caching.
- C. Views.
- D. Enterprise level SQL features.

ANSWER: A

102. What is the acronym of FLOSS?

- A. Free Licensed Open Source Software.
- B. Free/Libre and Open Source Software.
- C. Full Licensed Open Source Software.
- D. Fully License Organized Software Source.

ANSWER: B

103. If your application requires your customer to install a version of MySQL to operate it, but you are not giving to release it under the GPL, then you need _____.

- A. to purchase a MySQL commercial license for each version.
- B. to purchase a MySQL commercial license for each copy of application you sell.
- C. to purchase a MySQL commercial license once.
- D. not purchase a MySQL commercial license.

ANSWER: A

104. _____ database stores metadata information about all the other databases on the server.

- A. Spatial extension.
- B. InnoDB.
- C. INFORMATION-SCHEMA.
- D. Views.

ANSWER: C

105. Which should be used to specify named pipes?

- A. w.
- B. W.
- C. P.
- D. p.

ANSWER: B

106. Which of the following should be used to enable logging of all queries and their results?

- A. tee.
- B. force.
- C. log.
- D. default.

ANSWER: A

107. Which protocol should be used if client and server reside on the same machine?

- A. Pipe.
- B. Memory.
- C. TCP.
- D. Socket.

ANSWER: C

108. Which is the UNIX specific feature that facilitates communication between two different programs?

- A. Pipe.
- B. Memory.
- C. TCP.
- D. Socket.

ANSWER: D

109. Which is a Windows only feature that uses a common memory block to enable communication?

- A. Pipe.
- B. Memory.
- C. TCP.
- D. Socket.

ANSWER: B

110. Which options should we use to display query results vertically?

- A. E.
- B. v.
- C. t.
- D. X.

ANSWER: A

111. Which of the following is a third party client program that can be used with MySQL?

- A. mysqldump.
- B. mysqlcheck.
- C. MySQL Administrator.
- D. myisamchk.

ANSWER: C

112. Which utility can be used for backup in MySQL server while running?

- A. mysqlhotcopy.
- B. mysqlimport.
- C. mysqldump.
- D. myisamchk.

ANSWER: A

113. What is a candidate key?

- A. Used to uniquely identify a row.
- B. Alias for primary key.
- C. Used to identify a column.
- D. Alias for foreign key.

ANSWER: A

114. A view is nothing but a _____ table or a stored query.

- A. Dynamic.
- B. Real.
- C. Virtual.
- D. Static.

ANSWER: C

115. How can we get the number of records or rows in a table?

- A. Using COUNT.
- B. Using NUM.
- C. Using NUMBER.
- D. Using COUNT and NUMBER.

ANSWER: A

116. When do we use a HAVING clause?

- A. To limit the output of a query.
- B. To limit the output of a query using an aggregate function only.
- C. When GROUP by is used.
- D. To limit the output of a query using an aggregate function only and when GROUP by is used.

ANSWER: B

117. USE keyword is used to select a _____.

- A. table. b. c. d.
- B. column.
- C. database.
- D. table, column and database.

ANSWER: C

118. User() function returns the current users user name and _____.

- A. password.
- B. host name.
- C. password and hostname.
- D. database name associated with the user.

ANSWER: B

119. On executing DELETE command, if you get an error 'foreign key constraint', what does it imply?

- A. Foreign key not defined.
- B. Table is empty.
- C. Connectivity issue.
- D. Data is present in the other table.

ANSWER: D

120. How much storage space does DATETIME require?

- A. 4 bytes.
- B. 2 bytes.
- C. 8 bytes.
- D. 1 byte.

ANSWER: C

121. How do you avoid a table being altered by mysqld when you're running isamchk on it?

- A. Disconnect the network from the computer running mysqld so that it the databases can't be accesed.
- B. Run isamchk at a quiet time of day.

- C. Stop the MySQL daemon prior to running isamchk.
- D. Run mysql and use the LOCK command on the table.

ANSWER: D

122. The program called mysql is _____.

- A. a client program that lets you send SQL commands to the database engine.
- B. a program that starts up and shuts down the database engine.
- C. there isn't a program just called mysql .
- D. the database engine .

ANSWER: A

123. The USE command performs _____.

- A. chooses the database you want to use once you've connected to MySQL.
- B. has been deprecated and should be avoided for security reasons.
- C. is a pseudonym for the SELECT command.
- D. is used to load code from another file.

ANSWER: A

124. How many distinct, different values can you hold in an enum field?

- A. 255.
- B. 65535.
- C. x.
- D. 7.

ANSWER: B

125. Which of these is a valid call to a function (watch the spaces carefully!)?

- A. CONCAT ("A" , "B").
- B. CONCAT(A , B).
- C. CONCAT (A , B).
- D. CONCAT("A" , "B").

ANSWER: A

126. To use MySQL on your computer, you'll need _____.

- A. To use MySQL on your computer, you'll need _____. a. FTP and Telnet .
- B. Perl, PHP or Java .
- C. some sort of client program to access the databases.
- D. a Browser.

ANSWER: C

127. In a LIKE clause, you can ask for any value ending in "ton" by writing

- A. LIKE ^.*ton\$.
- B. LIKE *ton .
- C. LIKE ton\$.
- D. LIKE %ton .

ANSWER: D

128. Which of these field types would be best to hold a film title?

- A. tinytext.
- B. tinyblob.
- C. longblob.
- D. mediumtext.

ANSWER: A

129. You are required to buy a license for MySQL if _____.

- A. you use it on a publicly accessible site .
- B. you are never required to buy a license.
- C. you use MySQL in a live application and not just for evaluation.
- D. you incorporate it into a product that you sell.

ANSWER: D

130. MySQL is _____.

- A. a technique for writing reliable programs.
- B. a GUI (Graphic User Interface).
- C. an API (Application Programmer Interface).
- D. a Relational Database Management System.

ANSWER: D

131. What's the difference between the DESCRIBE and SHOW FIELDS FROM commands?

- A. Only DESCRIBE can take a LIKE clause.
- B. Only SHOW FIELDS FROM can take a LIKE clause.
- C. Nothing - they're the same thing.
- D. SHOW FIELDS cannot take LIKE clause.

ANSWER: C

132. When administering MySQL, you should make the data directory accessible via the operating system _____.

- A. only to the "mysql" user.
- B. to the "mysql" user, and also to the "webserver" user.
- C. only to the "root" user.
- D. to the "mysql" user, and also to people who are installing applications that use MySQL.

ANSWER: A

133. Which of these field types would be best to hold a .jpg image?

- A. nchar binary .
- B. blob.
- C. char.
- D. binary text.

ANSWER: B

134. A SELECT command without a WHERE clause returns _____.

- A. nothing.
- B. all the records from a table, or information about all the records.
