accredited at the 'A' Grade Level by the **NAAC** and ISO 9001:2008 Certified
CRISL rated 'A' (TN) for MBA and MIB Programmes

III MCA [2015-2018]

Semester V

Elective : Cloud Computing - 554U8

Multiple Choice Questions.

1. _____ is made up of a number of resources and layers with different levels of implementation.
- A. Grid.
 - B. Cloud.
 - C. Services.
 - D. Information.

ANSWER: A

2. _____ grid exploits the processing power from a distributed collection of systems.
- A. Information.
 - B. Compute.
 - C. Services.
 - D. Mix of them.

ANSWER: B

3. What do you mean by cloud in cloud computing?
- A. Data exchanged among grid nodes.
 - B. Provides tools to monitor and distribute the number of licenses.
 - C. Provides logical view of data.
 - D. Set of hardware, software, network, storage, services and interfaces.

ANSWER: D

4. What is the name of the Rackspace cloud service?
- A. Cloud On-Demand.
 - B. Cloud Servers.
 - C. EC2.
 - D. SimpleDB.

ANSWER: B

5. _____ delivers IT enabled services via internet that are built for the end user to be in control.
- A. Mobile computing.
 - B. Cloud computing.
 - C. Grid computing.
 - D. Green Computing.

ANSWER: B

6. What do people expect from cloud environment?
- A. Self -service.

- B. Fixed resources.
- C. Manual provisioning.
- D. Fixed payments.

ANSWER: A

7. Which of the following initiatives of dynamic cloud infrastructure reduce operating cost , improve responsiveness and utilize resources?

- A. Asset management.
- B. Virtualization and Consolidation.
- C. Service Management.
- D. Information Infrastructure.

ANSWER: B

8. What is the name of the organization helping to foster security standards for cloud computing?

- A. Cloud Security Standards Working.
- B. Cloud Security Alliance.
- C. Cloud Security WatchDog.
- D. Security in the Cloud Alliance..

ANSWER: C

9. The expansion of SLA is _____.

- A. Server level agreement.
- B. Service level agreement.
- C. Server local agreement.
- D. Service local agreement.

ANSWER: B

10. Which of the following is not a cloud computing barrier?

- A. Data security.
- B. Governance and regulatory compliance.
- C. Integration and interoperability.
- D. Data sharing.

ANSWER: D

11. Choose an best example for Self service

- A. Gmail.
- B. Bank ATM.
- C. Ticket Booking.
- D. Facebook.

ANSWER: B

12. What features admin could bring out the usage reports for cloud infrastructure service consumption?

- A. Virtualization.
- B. Resource Automation.
- C. Chargeback.
- D. Image pools.

ANSWER: C

13. What is Cloud Foundry?

- A. A factory that produces cloud components.
- B. VMware-led open source PaaS.

- C. An industry wide PaaS initiative.
- D. VMware-led closed source PaaS.

ANSWER: B

14. What are the benefits that cloud brings for an enterprise?

- A. Creates vendor locking.
- B. Decrease in operational efficiency.
- C. Trial and error configuration tests can be done.
- D. Partial control over cloud usage for admins.

ANSWER: C

15. Which of the following isn't an advantage of cloud?

- A. No worries about running out of storage
- B. Easier to maintain a cloud network
- C. Immediate access to computing resources
- D. Paying only for what you use

ANSWER: B

16. _____ is a facility used to house computer systems and associated components.

- A. Hardwarecentre.
- B. Softwarecenter.
- C. Datacenter.
- D. Storagecentre.

ANSWER: C

17. Which of the following is not a cloud characteristic?

- A. On-Demand Service.
- B. Single-Tenant.
- C. Ubiquitous network access.
- D. Rapid Elasticity.

ANSWER: B

18. Why are organizations taking action now to migrate to cloud computing?

- A. To derive greatest flexibility.
- B. To augment unlimited in-house resource.
- C. To create vulnerability to costly problems.
- D. To slowly develop an optimization roadmap.

ANSWER: A

19. How many months on an average do a new application takes to deploy?

- A. 7 to 10 months.
- B. 6 to 10 months.
- C. 7 to 9 months.
- D. 6 to 9 months.

ANSWER: D

20. How many types is Cloud delivery models categorized?

- A. 2.
- B. 7.
- C. 3.
- D. 4.

ANSWER: C

21. What type of cloud rents the capability and they pay for what they use on-demand?

- A. Private cloud.
- B. Public cloud.
- C. Hybrid cloud.
- D. Community cloud.

ANSWER: B

22. What does the term public does not mean?

- A. Free.
- B. Expensive.
- C. User data not visible.
- D. No security.

ANSWER: A

23. Which is a very low management cloud model with reliable SLA and scalability?

- A. Shared Private Cloud.
- B. Dedicated Private Cloud.
- C. Dynamic Private Cloud.
- D. Commodity Cloud.

ANSWER: C

24. Which of the following is not a security concern in cloud?

- A. Shared risk.
- B. Policies.
- C. Coding.
- D. Logical security.

ANSWER: D

25. _____ clouds are deployments made inside the company's firewall.

- A. Private.
- B. Public.
- C. Hybrid.
- D. Community.

ANSWER: A

26. Choose an application that does not fit in public cloud.

- A. Public facing web pages.
- B. Data intensive workloads.
- C. Health care record.
- D. Public wiki's, blogs.

ANSWER: C

27. The Internal private cost lowers the administrative costs by_____.

- A. 40%.
- B. 60%.
- C. 70%.
- D. 50%.

ANSWER: D

28. Which of the following is a type of data disaster?

- A. Insufficient Resource.
- B. Hosted tools.
- C. Database corruption.
- D. Operational Efficiency.

ANSWER: C

29. Which of the following is not a feature of Infrastructure Strategy and Planning?

- A. Assessment of current environment.
- B. Dynamic platform for datacenter.
- C. Development of value proposition.
- D. Roadmap to implement the selected cloud delivery model.

ANSWER: B

30. How many stages of path are there for cloud computing?

- A. 5.
- B. 4.
- C. 2.
- D. 3.

ANSWER: A

31. What are the two primary levels to achieve cost optimization?

- A. Operator expense and Capital expense.
- B. Operating expense and Capital expense.
- C. Operator Expense and Cloud Expense.
- D. Operating Expense and Cloud Expense.

ANSWER: B

32. What concept was introduced by Cloud Computing?

- A. Software-as-a-service.
- B. Platform-as-a-service.
- C. Storage-as-s-service.
- D. IT-as-a-service.

ANSWER: D

33. _____ service provides a software development environment that enables rapid deployment of new applications.

- A. SaaS.
- B. PaaS.
- C. IaaS.
- D. DaaS.

ANSWER: B

34. Which service is considered to be more mature for cloud offering?

- A. Paltform-as-a-service.
- B. Software-as-s-service.
- C. Infrastructure-as-a-service.
- D. Storage-as-a service.

ANSWER: B

35. What are the main drivers of cloud computing?

- A. Performance.
- B. Storage capacity.
- C. Resources.
- D. Cost and time.

ANSWER: D

36. _____ allows multiple operating system instances to run as guest on the same server.

- A. Server.
- B. Hypervisor.
- C. Network.
- D. Data.

ANSWER: B

37. Which of the following benefit helps to deploy the cloud deployment?

- A. High risk.
- B. Slower deployment.
- C. Improve service.
- D. Higher cost.

ANSWER: C

38. _____ is the method of recognizing activities that may indicate a malicious attack.

- A. Logging.
- B. Alerting.
- C. Authentication .
- D. Access control.

ANSWER: B

39. Define Service.

- A. A specific IT deliverable that provides customer value.
- B. Used to represent all the value addition activities.
- C. Used to improve service quality.
- D. It is a collection of services provided by IT.

ANSWER: A

40. A collection of related activities that takes inputs, transforms them and produces outputs is termed as _____.

- A. Enablers.
- B. Process.
- C. Service Owner.
- D. Delivery.

ANSWER: B

41. What provides a set of project services such as planning, design, assembly and integration?

- A. Software Platform.
- B. Deployment services.
- C. Software Platform Management services.
- D. Platform Integration and Deployment services.

ANSWER: D

42. Which of the following service comes under Platform Integration and Deployment services?

- A. Installation.

- B. Application Scripting.
- C. Emergency replacement.
- D. Patch Management.

ANSWER: A

43. Which of the following service comes under Software Platform Management services?

- A. Order Management.
- B. Base Backup.
- C. Compliance services.
- D. Asset tagging.

ANSWER: C

44. What services include business services and user services?

- A. Internal services.
- B. External services.
- C. User-initiated service.
- D. Customer-initiated service.

ANSWER: B

45. What service is used to discover the applications that are used across the organization?

- A. Application Portfolio Management.
- B. Application Scripting.
- C. Application Discovery.
- D. Application Detection.

ANSWER: C

46. How is application architecture selected in cloud application?

- A. Criteria Evaluation.
- B. Business functions.
- C. User experience.
- D. Cloud delivery model.

ANSWER: A

47. Which of the following is a type of Business Support Service activity?

- A. Configuring network components.
- B. Managing fault.
- C. Managing order data.
- D. Maintaining network inventory.

ANSWER: C

48. Cloud Service is also referred to as_____.

- A. Cloud Service Provider.
- B. Cloud Service Product.
- C. Cloud Service Vendor.
- D. Cloud Service Offering.

ANSWER: B

49. Expand BPM.

- A. Business Procure Management.
- B. Business Product Management.
- C. Business Produce Management.

D. Business Process Management.

ANSWER: D

50. Which of the following way helps the cloud environment to integrate the core business?

- A. Bottom line success.
- B. Continual Improvement.
- C. Business and technology.
- D. Cultural.

ANSWER: C

51. Choose the suitable question to identify the BPM opportunity.

- A. What are the past process initiatives?
- B. Has the organization adopted SOA?
- C. What architecture does the organization have?
- D. What services are provided?

ANSWER: B

52. What category is termed to deploy customer services over multiple cloud platforms?

- A. Cloud service intermediation.
- B. Cloud service arbitrage.
- C. Cloud delivery.
- D. Cloud aggregation.

ANSWER: D

53. Which of the following person considered as the role of cloud orchestrator?

- A. Datacentre Manager
- B. Cashier
- C. Account Owner
- D. Security

ANSWER: C

54. What do you mean by On-Premise Cloud Orchestration and Provisioning engine?

- A. It is a bundled offering that includes software and services.
- B. It is a bundled offering that includes hardware and services.
- C. It is a bundled offering that includes hardware and software.
- D. It is a bundled offering that includes hardware, software and services.

ANSWER: D

55. How much percent is spent in assembling and re-assembling existing infrastructure in IT datacenter?

- A. 70%.
- B. 60%.
- C. 80%.
- D. 40%.

ANSWER: A

56. The term 'Lights-out' is related to _____.

- A. Ease of consumption.
- B. Zero touch automated operations.
- C. Automatic expandable.
- D. End -end across server.

ANSWER: B

57. Which is the viable option for the on-demand computing environment to meet the requirement?

- A. Cloud Engine.
- B. Charging model.
- C. Pre-provisioning.
- D. Balancing workload.

ANSWER: C

58. _____ is used to automatically provide additional processor capacity on a temporary basis.

- A. Utility CoD.
- B. Value CoD.
- C. Service CoD.
- D. Cost CoD.

ANSWER: A

59. Which of the following is not a cloud platform characteristic based on CoD?

- A. Low-End Servers.
- B. On-Demand Platform.
- C. Dynamic capacity.
- D. On-Demand CPU.

ANSWER: D

60. Outsourcing the end to end solution using cloud methodology for public cloud, infrastructure and platforms is termed as _____.

- A. Crowdsourcing.
- B. Cloudsourcing.
- C. Datasourcing.
- D. Informationsourcing.

ANSWER: B

61. _____ is a growing set of recommended practices and technologies to manage data more efficiently and effectively.

- A. Information Lifecycle Monitoring.
- B. Intermediate Labour Management.
- C. Information Lifecycle Management.
- D. Intermediate Labour Monitoring.

ANSWER: C

62. Choose from the following the specific objective to improve the information management.

- A. Decrease the system performance.
- B. Cost reduction.
- C. Decreased effectiveness.
- D. Reduce the personnel productivity.

ANSWER: B

63. Which of the following comes under the category of investment cost?

- A. Storage hardware maintenance.
- B. Storage software maintenance.
- C. Outages.
- D. Transition services.

ANSWER: D

64. _____ is referred to documented set of storage related tasks and activities required to support a storage infrastructure.
- A. Storage Service.
 - B. Storage Process.
 - C. Storage tier.
 - D. Storage Infrastructure.

ANSWER: B

65. Which of the following does not belong to type of competency area in cloud business analytics?
- A. Business intelligence and performance management.
 - B. Analytics and optimization.
 - C. Content management system .
 - D. Information taxonomy.

ANSWER: D

66. How cloud analytics works?
- A. It works with the combination of hardware, services and middleware.
 - B. It works only with the hardware.
 - C. It works with the combination of hardware and services.
 - D. It works with the combination of hardware, services and not middleware.

ANSWER: A

67. What are the two main constituencies are tasked for Enterprise IT Operations Managers?
- A. Application and Programming teams.
 - B. Testing and Programming teams.
 - C. Application and Development teams.
 - D. Development and Testing teams.

ANSWER: C

68. How do you name the process of instantiating the service catalogue item?
- A. Runtime scaling.
 - B. Testing.
 - C. Allocation.
 - D. Resilience.

ANSWER: C

69. Which security control is used to detect a security incident?
- A. Preventive.
 - B. Detective.
 - C. Corrective.
 - D. Protective.

ANSWER: B

70. Which of the following is a type of physical security?
- A. Policies.
 - B. Audit.
 - C. Software.
 - D. Biometric.

ANSWER: D

71. _____ is an advantage of Virtual Desktop Infrastructure.

- A. Agility.
- B. Flexibility .
- C. Plasticity.
- D. Elasticity.

ANSWER: B

72. What does Virtual Desktop Infrastructure provides?

- A. Data Protection.
- B. End - user solutions.
- C. Security Compliance.
- D. Application Security.

ANSWER: B

73. Connecting remote desktop clients to the centralized virtual desktops is known as _____.

- A. Information brokering.
- B. Connectionless brokering.
- C. Service brokering.
- D. Connection brokering.

ANSWER: D

74. What difficulty often cloud administrators face concerning storage and data management?

- A. Cutting costs.
- B. Lower costs.
- C. Lack of automation.
- D. Low operating costs.

ANSWER: C

75. Recovery Point Objectives and Recovery Time Objectives are the _____ of Storage Cloud.

- A. Benefits.
- B. Challenges.
- C. Drawbacks.
- D. Business Drivers.

ANSWER: D

76. How the cost model must be to provide cloud business?

- A. Complex.
- B. Complete.
- C. Equitable.
- D. Reasonable.

ANSWER: C

77. What approach has been driven in part by cost transparency and cost reduction requirements?

- A. Cost-based.
- B. Service-based.
- C. Structured-based.
- D. Organization-based.

ANSWER: B

78. _____ refers the capacity to rapidly adapt and respond to risks and opportunities.

- A. Agility.

- B. Chargeback.
- C. Resiliency .
- D. Performance.

ANSWER: C

79. Which of the following perspective implements the power protection?

- A. Strategy and vision.
- B. Organizational.
- C. Process.
- D. Facilities.

ANSWER: D

80. _____ is a service that uses a group of compliant processes.

- A. Service Realization.
- B. Solution Realization.
- C. Quality Assurance.
- D. Request for Service.

ANSWER: B

81. Which of the following is not a short term objective of provisioning?

- A. Reduce rework.
- B. Reduce the defect rate.
- C. Reduce time to set up development.
- D. Improve consistency.

ANSWER: C

82. _____ is sued to track any interruptions or issues to the asset management.

- A. Incident Management.
- B. Software Packaging.
- C. Pool Management.
- D. Release Management.

ANSWER: A

83. _____ management is both process and service.

- A. Backup.
- B. Operational readiness.
- C. Configuration.
- D. Systems.

ANSWER: D

84. Which of the following task falls under the compliance phase?

- A. Audits.
- B. Reversibility.
- C. Standards.
- D. Templates.

ANSWER: B

85. Which of the following task falls under the governance phase?

- A. Interoperability.
- B. Data regulation.
- C. Service level.

D. Monitoring.

ANSWER: D

86. _____ focuses on avoiding/recovering from non-catastrophic disruptions.

- A. Disaster recovery.
- B. Floods.
- C. High availability.
- D. Low availability.

ANSWER: C

87. _____ is the process of creating, verifying and maintaining an IT continuity plan.

- A. Disaster recovery.
- B. Recovery time.
- C. Recovery point.
- D. Disaster detecting.

ANSWER: A

88. Which model focuses on class of service and guaranteed availability resources for business applications?

- A. Pay-per-use-model.
- B. Standard subscription model.
- C. Premium Pricing model.
- D. Hybrid model.

ANSWER: C

89. Which chargeback approach adds elements of negotiation and capacity planning?

- A. Allocation - based.
- B. Flat fee.
- C. Usage - based.
- D. Product -based.

ANSWER: B

90. Which of the following is an example of product based costing?

- A. Printing a report.
- B. Handling a claim.
- C. Maintaining a ledger.
- D. Policy.

ANSWER: D

91. What benefit is provided by virtualizing the service infrastructure?

- A. Spend money.
- B. Increase control.
- C. Complex disaster recovery.
- D. Model readiness assessment.

ANSWER: B

92. What is the need for virtualization?

- A. To reduce the complexity.
- B. To decrease the utilization of information.
- C. To build homogeneous infrastructure.
- D. To delay in SLA response times.

ANSWER: A

93. What creates a virtual 'network in a box ' solution that allows the hypervisor to manage virtual machine?

- A. Virtual Disk.
- B. Virtual CPU.
- C. Virtual Memory.
- D. Virtual Networking.

ANSWER: D

94. _____ is an operating system -level virtualization rather than a hardware-level hypervisor solution.

- A. Storage Virtual motion.
- B. Storage motion.
- C. Zone.
- D. Logical Domain.

ANSWER: C

95. Which of the following statement is true about virtualization technology?

- A. Allows manual provisioning of environments.
- B. Administration software constantly monitors the software.
- C. Save energy by powering off the servers.
- D. Allows automatic deployment of applications.

ANSWER: D

96. _____ is a collection of physical bare - metal hypervisor installed servers and associated virtual machines with shared resources.

- A. Power Management.
- B. Dynamic storage.
- C. Distributed Resource Scheduler.
- D. Fault tolerance.

ANSWER: C

97. What is the reason for using virtual machine templates?

- A. Efficiency.
- B. Scalability.
- C. Storage.
- D. Dynamic Allocation.

ANSWER: A

98. _____ is a server environment that does not physically exist but is created on another server.

- A. Physical machine.
- B. Logical machine.
- C. Guest machine.
- D. Virtual machine.

ANSWER: C

99. Which of the following level of privilege of x86 architecture is used for user level applications?

- A. Ring 0.
- B. Ring 1.
- C. Ring 2.

D. Ring 3.
ANSWER: D

100. Which of the following are the major types of virtualization technologies?

- A. Type1 and Type3.
- B. Type1 and Type2.
- C. Type3 and Type4.
- D. Type2 and Type4.

ANSWER: B

101. Paravirtualization is also known as _____.

- A. OS-assisted virtualization.
- B. OS-based virtualization.
- C. OS-level virtualization.
- D. OS virtualization.

ANSWER: A

102. Which of the following is not a function hypervisor management software?

- A. Create VM.
- B. Store VM.
- C. Delete VM.
- D. Move VM.

ANSWER: B

103. _____ partition is a partition that is allowed to update the hypervisor.

- A. Network.
- B. Logical Memory.
- C. Service.
- D. Physical Memory.

ANSWER: C

104. What is the purpose of design in virtual infrastructure?

- A. Define the disk and network structure.
- B. Define the logical memory blocks.
- C. Define the physical memory blocks.
- D. Document the recommendations.

ANSWER: A

105. Which of the following should be included in the virtualization design document?

- A. Resource Allocation.
- B. Backup methodology.
- C. Data Distribution.
- D. Virtualized OS.

ANSWER: B

106. Expand SAN.

- A. Server Area Network.
- B. Storage Area Node.
- C. Server Area Node.
- D. Storage Area Network.

ANSWER: D

107. _____ helps the business to create an integrated, virtualized solution that aligns with the environment.

- A. Storage Optimization and Integration Services.
- B. Virtual storage pool.
- C. Value Proposition.
- D. Storage Drivers.

ANSWER: A

108. Which of the following storage is available remotely and uses the file based protocols?

- A. Storage Area Network.
- B. Network-Attached Storage.
- C. Storage Devices.
- D. Disk arrays.

ANSWER: B

109. Which of the following is not a storage of storage area network?

- A. Direct attach storage.
- B. Centralized but still Direct attach storage.
- C. Shared Storage.
- D. Distributed Storage.

ANSWER: D

110. Under which complexity case, the storage devices has to be configured and installed.

- A. Complexity case A.
- B. Complexity case E.
- C. Complexity case D.
- D. Complexity case C.

ANSWER: C

111. _____ is one of the heterogeneous benefits of storage virtualization.

- A. Data migration.
- B. Scalable.
- C. Effective use of capacity.
- D. Lower total cost of ownership.

ANSWER: A

112. Which of the following feature is not available in NAS?

- A. Specific function.
- B. Plug and play.
- C. Directory server.
- D. Network applications.

ANSWER: C

113. Choose from the following the common NAS protocol for windows environment.

- A. Network File System.
- B. Common Internet File System.
- C. iSCSI.
- D. Fibre Channel over Ethernet.

ANSWER: B

114. Which of the following traditional NAS features is not available in high performance NAS ?

- A. PIT copies.
- B. Load balancing.
- C. Tuning.
- D. LAN bandwidth.

ANSWER: A

115. Which of the following activity focuses on helping businesses with problem determination or problem source identification?

- A. Network infrastructure assessment.
- B. Network performance analysis.
- C. Network diagnostic assessment.
- D. Network capacity planning.

ANSWER: C

116. _____ is one of the primary requirement of datacenter with respect to datacenter virtualization.

- A. Unmodified operating systems.
- B. Resource optimization.
- C. Application Availability.
- D. Management.

ANSWER: A

117. Balancing the workload by transferring the under performing servers is a feature of _____.

- A. High availability.
- B. Operational automation.
- C. Dynamic resource.
- D. Live Migration.

ANSWER: D

118. Which of the following is eliminated in data and storage network convergence?

- A. Increasing the hardware components.
- B. Duplicate infrastructure.
- C. Mange risk.
- D. Improve service.

ANSWER: B

119. Which service component is available under network integration services datacenter networks?

- A. Enterprise network.
- B. Communications strategy and planning.
- C. Security and firewalls.
- D. Network application optimization.

ANSWER: C

120. Connecting virtualized servers and storage, supporting platform specific network requirements is the service of _____.

- A. System Virtualization.
- B. Legacy Environment.
- C. Device Virtualization.
- D. Cloud Computing.

ANSWER: A

121. Which of the following is a similarity between cloud infrastructure and SOA?

- A. Process Management.
- B. Service Management.
- C. Order Management.
- D. Catalogue Management.

ANSWER: B

122. The expansion of SOA is _____.

- A. Software oriented architecture.
- B. System oriented architecture.
- C. Server oriented architecture.
- D. Service oriented architecture.

ANSWER: D

123. Which of the following is not a cloud infrastructure service component?

- A. Integration software.
- B. Physical infrastructure.
- C. System Software.
- D. Management software.

ANSWER: A

124. Which of the following is well suited to legacy application support?

- A. Service oriented architecture.
- B. Application architecture.
- C. Service oriented infrastructure.
- D. Workload management.

ANSWER: C

125. Which of the following is true about SOA?

- A. SOA applications do not require the end-end performance.
- B. SOA breaks the application framework into discrete service components.
- C. SOA infrastructure is designed with both application and infrastructure perspective.
- D. SOA applications do not require the end-end security.

ANSWER: B

126. What is needed to run between the different cloud being used which allow users to utilize remote services without connectivity and interoperability issues?

- A. Server communication backbone.
- B. Service connection backbone.
- C. Service communication backbone.
- D. Server connection backbone.

ANSWER: C

127. Which of the following can be moved dynamically between components allowing minimal unplanned and no planned downtime?

- A. Processor.
- B. Memory.
- C. I/O resources.
- D. Workloads.

ANSWER: D

128. From the given characteristics, how the service can be defined?

- A. Loosely bound.
- B. Business processes.
- C. Secure standardized components.
- D. Changing business priorities.

ANSWER: A

129. What aspect of SOA view defines and design the services?

- A. Business view.
- B. Process view.
- C. Architecture view.
- D. Implementation view.

ANSWER: C

130. _____ is an important feature of service - orientation.

- A. Stress location transparency.
- B. Separation of concerns.
- C. Organization culture.
- D. Implementation of service.

ANSWER: B

131. Which services provides processing and networking resources for applications and business functions?

- A. Application Services.
- B. Information Services.
- C. Common IT Services.
- D. Infrastructure Services.

ANSWER: C

132. What does energy efficiency substantially improves on?

- A. Data replication.
- B. Network utilization.
- C. Information dissemination.
- D. Regulatory compliance.

ANSWER: B

133. Which is the first step to be considered for leveraging cloud infrastructure?

- A. Planning.
- B. Value-driven.
- C. Analysis and Strategy.
- D. Implementation.

ANSWER: C

134. Which of the following acts as a lever to progress for the business?

- A. Diversity.
- B. Investment cost.
- C. Software application.
- D. System Performance.

ANSWER: D

135. _____ requires capabilities to configure specific interconnections in the integration

solution.

- A. Integration specialist.
- B. Business analyst.
- C. Software architects.
- D. Programmers.
